

Questions on Chip Comparators

1. How much money have we invested in development as well as purchases of these comparators?

25X1

2. Why did almost two years elapse before we formally told [redacted] in July 1966 of our concern?

25X1

*Many service call - in house problem
8/11/66*

3. Who in the Center is responsible for checking with those components who have purchased equipment in order to state whether or not the equipment operates satisfactorily?

4. Do any of the comparators work at all? *405A - Aug*

5. Are the comparators useful for [redacted] and other current and projected take? If there is doubt on this score, why do we continue to mess with this? Maybe we should just take our loss. *yes*

25X1

ILLEGIB

On what basis and with what rationale did we proceed to purchase in mid-64? Who certified acceptability of the prototype and what kinds of tests were used on the prototype?

405B 405A
IAS - 1 + 1
PAR - 2
TND - 1 (25)
DIA - 1
5 + 1

All will be used in #213
